Prices Realized September 13, 1987 Auction Sale

The first auction sale of medals, medallic art and similar collectibles under the banner of the new Collectors' Auctions Ltd. was held September 13th at the Greater New York Coin Convention.

The sale showed strength in the medal market, particularly in the Olympic, Columbian Exposition, art medals, Victor Brenner and Washington medals. Sales of modern Israel, Judaica and space medals were not up to expectations.

Numerous items brought well over estimate, including the following:

Liner Leonardo da Vinci Plaquette (lot 474)	$330
ANS Centennial Medallion by Fraser (lot 528)	110
US Constitution Sesqui Plaquette (lot 44)	308
Art Deco General Motors Anniv Medal (lot 170)	253
Marilyn Monroe by Paris Mint Medal (lot 272)	192
A.C. Gilbert's peronal track medals (lot 777)	517
Better Babies Medal by Fraser (lot 128)	187

PAIR WEIZMANN INSTITUTE MEDALS

282. Weizmann Institute of Science 25th Anniversary Medal, 1959; 2-inch (50.4mm) bronze. By Robert Berks, sc.

This medal is made in imitation of an ancient *contorniate*—somewhat of a game piece but closely resembling a coin. It has special thickness, a special edge and special borders. In addition—as a modern touch—it has a special patina finish (all described below).

Obverse bust of Chaim Weizmann (1874-1952) chemist, scholar, Zionist leader and first president of Israel, executed in *style rude*, a highly textured surface. The portrait is located, along with name & dates, in a concave or dished surface of the obverse flan.

The piece has a double beveled border or rim and contorniate edge. The obverse bevel contains the legend Weizmann Institute of Science in both English & Hebrew. The edge has a double furrow—its contorniate feature—harking back to ancient game pieces where the irregular edge aided a person in picking up the piece.

Reverse aerial view of compound housing the buildings of the Weizmann Institutes of Biochemistry, Biophysics and Technology, the residence of Chaim Weizmann and the Daniel Sieff Research Institute (of which he was a lifelong director), all in Rehoboth Israel, near Tel Aviv. The rev, like the obv, is set in a concave flan but not as apparent because of the relief scene of the buildings. The artist's signature appears in the lower right.

The rev bevel border contains the dates 1934, 1959, The Daniel Sieff Research Institute in English & Hebrew.

Finish: background surfaces on obv & rev is satin finish; the relief is highlighted and the bevel borders & edge are polished, giving the effect of three separate finishes. The piece is edgelettered Bronze with no maker's name. But it was struck by Medallic Art Company, then of NYC, now of Danbury. It is their catalog number 59-82.

Unlike a medal and carrying its contorniate theme one last step—the piece is coin turn—head to foot not head to head as most medals.

Condition: the piece at hand is AU with no nicks, no flaws & only the slightest breaks at the circular highpoint, the pinnacle where the concave flan rises to the terminus of the bevel border.

The cataloger knows of only one private American collection with this piece included; thus it is legitimately scarce. Unusual design. Numismatic heritage. Museum quality. Supreme condition. Utmost rarity. This piece deserves a respectable bid. $500-600

283. Weizmann Award Medallion, 1959; 4 7/8-inch (12.34cm) cast bronze. By Robert Berks, sc.

Obv identical to the struck medal (previous lot) in regard to portrait, lettering, concave flan & bevel border, only larger in size.

Rev tree with many leaves in raised rectangular panel above a raised cartouche; lettering on beveled border: Weizmann Award in English & Hebrew.

The award medallion differs from the anniversary medal primarily in its finish—with uniform light brown patina (no part is polished nor satin finish); also the medallion is medal turn (head to head).

No maker's name present, but presumed cast in Israel. Slight casting flaw on rev, 5 cm crack at right to center.

Again, only one private collection in this country has this piece. Scarce. Excellent quality. Exclusive companion to previous lot! AU $400-500

MEDALS FROM THE A.C. GILBERT COLLECTION

The name Gilbert and Erector Set are synonymous to any boy over 30 years of age. The Gilbert was Alfred Carlton Gilbert (1884-1961) who developed a number of learning toys, built a business to create & distribute these and became the legend to all American youth. He wrote the manuals for his sets, and lifelong interests in fields of chemistry, magic, mineralogy, meteorology, among others, were launched with his products. He held an interest in track throughout his life and twice held the world's record for pole vault (1907: 12 ft 3 in, and 1908: 12 ft 7 3/4 in). The following lots are his personal track medals.

SATIN GOLDPLATED U.S. MINT PRESIDENT MEDALS

882. **(List 101-141) Complete Set of 38 U.S. Mint Presidential Series Medals, 1820-1977;** 3-inch (76.0mm) bronze goldplate. Includes every President from Washington to Jimmy Carter. The Presidential series currently available from the Mint has been satin goldplated to form an extremely attractive uniformly finished set of large medals. (The Jimmy Carter Medal-added later-is not satin finish, but rather a polished gold finish).

Ideal display! We have seen only one other set like this, in the President's office of a Mint supplier. But present set is more attractive. To buy the medals today (at $16 a piece) and have each medal goldplated would cost over $1000. This existing set is a rare opportunity for someone's den or office.

Condition is superb. We see an edge nick or two but no imperfects on any piece! Gem AU. 37 pieces $650-900

GERMAN GEDENKTHALER MEDALS

Struck in the approximate size of the Vereinsthaler and later 3-mark commemorative coins were 1 1/4-inch (33-35mm) silver *gedenkthaler.* These coin-relief medals first filled the void left by the absence of German commemorative coins from 1873-1900. Later issues hailed early World War I victories and were made by many of the popular medallic firms such as L. Chr. Lauer, Oertel, Ball, Mayer & Wilhelm, B.H. Mayer and others. Their uniformity in size makes them an appealing series, which trailed off under war's austerity to thinner planchets and finally *ersatz* metals including bronze, iron and zinc. They were struck on coining presses (not medal presses) and are comparable to American so-called dollars. so-called dollars.
